Doctor of Philosophy in Computer Science

The Doctor of Philosophy in Computer Science is designed to develop scientists capable of conducting independent research in Computer Science. Courses are organized depending on the research interest of each candidate so as to provide him with a deeper knowledge of Computer Science as well as ample preparation for scientific research in his chosen field of specialization. As part of a sandwich program, a PhD candidate is encouraged to spend 3 to 12 months of dissertation research at a host university in a foreign country to provide him with opportunities to discuss research work with international experts.

Admission Requirements
The program accepts applicants who have an MS degree in Computer Science with research-based thesis and at least one research-based paper published in a national or international refereed CS conference. Master’s degrees from the following fields may be considered for entry into the program (others may be considered on a case-to-case basis) upon completion of the required remedial coursework:

1. MS in Computer Science without a research-based thesis
2. Masters in Computer Science
3. MS in Information Technology
4. BSCS with an MS degree in another field.
5. BS and MS degree in another field but with IT experience

Note:
• For (1) and (2), applicants must undergo 6 units remedial coursework, and 3 units Methods of Research.
• For (3), (4), and (5), applicants must undergo 15 units remedial coursework, and 3 units Methods of Research.

In addition, the applicant should have a GPA of at least 80% or equivalent in the MS course. For foreign applicants from non-English speaking countries, a TOEFL score at least 550 is required.

Degree Requirements
The PhD degree in Computer Science is obtained primarily through supervised research. It is awarded upon fulfillment of the following requirements:

• completion of all academic courses
• submission of a doctoral dissertation based on an independent, original research
• successful defense of the doctoral dissertation
• publication of a full paper on the dissertation research in a reputable refereed international scientific journal with the PhD candidate as first author
• fulfillment of residency and other university requirements

Academic Program Components
For applicants with a degree of Master of Science in Computer Science with a research-based thesis:
Specialization Courses 18 units
Doctoral Dissertation 12 units
Total 30 units

For applicants with a degree of Master of Science in Computer Science or Masters in Computer Science without a research-based thesis, the following are the remedial academic requirements before entering into the PhD program proper:
Remedial courses 6 units
Methods of Research 3 units
Research-based paper published in a national or international refereed CS conference
For applicants with a degree of Master of Science in Information Technology, or BSCS with a non-MSCS degree, or non-BSCS and non-MSCS degree but with IT experience, the following are the remedial academic requirements before entering into the PhD program proper:

Remedial courses 15 units
Methods of Research 3 units
Research-based paper published in a national or international refereed CS conference

Note:
Remedial courses can be MSCS Foundation Courses or Electives as defined by the Graduate Program Coordinator on a case-to-case basis.
