University Library Receives More Donation from CTU

On September 22, 2005, the University Library received twenty boxes of library materials donated by the Catholic Theological Union (CTU), a Roman Catholic school of theology and ministry based in Chicago, Illinois. The boxes contained 3,493 volumes of books, 58 journal titles (94 issues), 3 VHS tapes, 1 long playing album and 1 map.

CTU’s donation consists of titles mostly on theology, mission studies, history of religions, and homiletics with some books on varied subjects.

The donation was already the second; the first was shipped to Manila in January 2004 containing 2,345 volumes of books. It was through the effort of Dr. Jose de Mesa and Fr. Daniel Kroger, OFM of the Theology and Religious Education Department (TRED) that the donation was made possible.

Formal turnover of the collection was held at the Technical Services of the University Library on October 6, 2005 with Dr. de Mesa presenting the materials to Dr. Julius Maridable, VP for Academic and Research, in the presence of Ms. Agnes Yuhico, Fr. Daniel Kroger, and Dr. Arnold Monera.

Dr. Jose de Mesa (middle) presents the books to Dr. Julius Maridable (second from right) during the formal turnover. With them are Ms. Agnes Yuhico, Fr. Daniel Kroger, and Dr. Arnold Monera.
Initial Impact of OFF CAMPUS ACCESS Service

On September 16, 2005, the 4th class day of the second trimester, a new service facility was introduced to the academic community. This service is called the OFF CAMPUS ACCESS to online subscriptions that enable the DLSU-Manila faculty and students to search and retrieve information remotely from major online databases without dialing up for connection with the DLSU server. Supported by the web access management module of the current library information system, the said facility requires the searchers to login with their ID number and password or pin (self-assigned personal information name or number).

10 Most Frequently Used Print Periodicals
June-September 2005

The Periodicals Section prepares monthly usage report of print periodicals subscriptions per college. Figures are derived from the charged out and usage slips. The monthly usage reports are distributed to the different departments via email. The usage statistics are used for the evaluation and assessment of the journals to justify the need for their renewals and cancellation.
Franco Passes Board Exams

Our heartfelt congratulations to the successful examinees in the recent Licensure Exam for Librarians, in particular, to our very own Harold Torralba Franco, who works as an assistant librarian at the Archives. Franco is a 22 year old new graduate of Bachelor of Library and Information Science from the University of the Philippines, Diliman. He was a student assistant at the UP Integrated School, a contributor writer of Balikkalikasan, and Project Librarian at GMA Network Inc. He will take his oath together with the other successful examinees on Friday, November 25, 2005 at 1:30 P.M. at the Manila Hotel, One Rizal Park, Manila.

Our cheers also go to the Board for Librarians (BFL) with Perla T. Garcia as Chairman, for their good work. The results were released in just one working day. There were 240 out of 762 examinees who passed.

Verzosa Lectures at International Conference

Archivist Fe Angela M. Verzosa lectured on “Digital Initiatives in Archival Preservation” at the International Conference on Challenges in Preserving and Managing Cultural Heritage Resources. It was held last October 19-21 at the Institute of Social Order, Ateneo de Manila University in Loyola Heights where more than ten foreign experts shared their expertise and experiences. Her presentation dwelt on how innovative use of information technology has enabled archival heritage resources to be accessed anywhere anytime by anyone who needs them. She expounded on digital archives as an emerging platform for cooperative preservation efforts, exploring both international and local digital models to showcase their different frameworks. Digitization, she cautioned, however, must not be viewed as a substitute for other preservation activities. Preserving the originals increases their intrinsic value as evidence of documentation. And, she added, digital preservation is largely experimental and replete with the risks associated with untested methods, or those which have not withstood the test of time. Maintaining the integrity of digitized information over time is another major concern aside from the twin issues of technological obsolescence and “shelf life.”. However, if digitized materials serve as surrogates to the originals, digitization can enhance preservation efforts by reducing the frequent handling of original documents, and thereby helps to protect them from damage, loss, and other man-made disasters.

Ladlad Visits Asian Libraries

Jocelyn L. Ladlad, the EDRC and ASRC librarian, went to Singapore and Kuala Lumpur for a library study visit from October 9 to 13, 2005. She was with 17 librarians and school administrators from different schools in Metro Manila. All of them are members of the Association of Special Libraries of the Philippines (ASLP) which sponsored the activity. J. Ladlad is the vice president of the said organization.

The group visited the Temasek Polytechnic and National University of Singapore and a public library right at the heart of a shopping mall, the Library@Orchard. In Kuala Lumpur, they visited the libraries of the Universiti Technologi of Mara and the University of Malaya. They had also the opportunity to go to 3M Kuala Lumpur where they were shown the latest technology for library application. After the library visits, they toured the historical and tourist sites in both cities.

In all the institutions they visited, the group were warmly welcomed. They were given brief orientation regarding their libraries followed by a tour. The group was very impressed not just with the luxury of space of each of the library but most of all with the application of latest technology in their operation and management. Some of the new ideas and technology the group appreciated, and perhaps being contemplated on, are the self service book loan, the automated books chute with sorter, centralized loan desk, a lounging room with vendo machines for simple snacks, automindividual cubicle for graduate students, and the spacious staff lounging area. Appreciation and amazement were expressed by the ooohhs and aahhhs reaction of the group. In the mind of each of the participant is the question of how and when each could also enjoy these technologies in our home institution. Perhaps we may not have an immediate answer but at least we were inspired to do better.
**International Conference on Managing and Preserving Cultural Heritage Resources**

by Marita G. Valerio, Bibliographic Control Librarian

Clarita D. Tagasa, Circulation Librarian, and Marita G. Valerio, Bibliographic Control Librarian, attended the “International Conference on Challenges in Preserving and Managing Cultural Heritage Resources” at the Institute of Social Order (ISO), Ateneo de Manila University, Quezon City last October 19-21. This international conference featured 12 distinguished speakers and six poster presenters from different fields specializing in preservation, conservation and management of cultural heritage resources. They stressed on the importance of preserving and managing the cultural heritage resources in libraries, archives, museums and information centers abroad and in the Philippines. The different collecting and preservation initiatives among different countries and the many challenges involved were presented. Singapore, USA, and Australia, for example, have developed projects involving fumigation and selective microfilming, conservation, and digitization of their heritage materials requiring different types of conservation treatments. With full application of modern technology, these countries continue providing direct efforts towards preservation of their cultural heritage materials, the improvement of regional, and global access of these valuable and rare materials among researchers, historians and library users.

In the Philippines, preservation efforts are more of preventive maintenance which include among others: maintenance of clean and odorless surroundings, installation of an air conditioning system, maintaining a controlled environment using dehumidifier, fumigation, conservation, selective microfilming and microfiching, and most recently, digitization of selective rare and other important collections found in university libraries, archives and museums.

Trends on planning for new museums, heritage centers, libraries, and archives in the new Millennium were presented. The structure, the system, and the management of the Storage and Retrieval System (ASRS) to house 500, 000 books at the International Christian University (ICU) in Tokyo had attracted the audience’s interest and attention. It solves not only the space problems and management of books but creates opportunities for new collection management and shifting human resources to digital library services.

A tour at Lopez Museum, San Agustin Museum, Rizal Shrine, Casa Manila, and Museo Recoletto concluded this 3 day conference.

**Faculty and Staff Attend National Seminar-Workshop**

by Elizabeth Padilla – Librarian, Periodicals Section

A delegation from our library composed of Yolanda Odsinada, Head, Readers’ Services, Elizabeth Padilla, Periodicals Librarian, Florbella Bongalos and Felicidad Caparas from the Archives, Ricardo Rodriguez, Jojie Gonda, Bob Cauilan and Robert Vallente of the Technical Services participated in a two-day PAARL sponsored seminar-workshop entitled, “Technical Services in the Changing Library Environment” on October 17 and 18 in Island Cove Resort, Binakayan, Cavite.

Ms. Ana Fresnido, Head, Technical Services and board member of PAARL, updated the participants on the latest cataloging practices with Fe

(L-R) Jojie Gonda, Felicidad Caparas, Robert Vallente, Ricardo Rodriguez, Elizabeth Padilla, Florbella Bongalos, and Bob Cauilan at Island Cove.

Angela Verzosa of Archives as the seminar coordinator.

The two-day affair tackled the emerging technologies that are transforming the technical aspects of library work. Innovative methods as well as existing technical standards were presented and further discussed. Small group discussions were conducted to identify the current outstanding technical practices among libraries represented in the various groups. The seminar-workshop was fruitful for it achieved its purpose.

The attendees left with creative ideas on how to keep abreast with the current trends and the challenge to face the opportunities brought by these changes.
Log report generated by the system, the performance of the service in terms of the number of records retrieved, viewed and or downloaded in September and October 2005.

**Results:**
1. The average daily rate of retrieval in September was 459 records per day while in October it was 526 per day with an increase of 14.59%.
2. Searches in September came predominantly from graduate students accessing EBSCO databases that cover information sources on business, management, finance and other related topics.
3. In October the undergraduate students dominated access among the patron type and EBSCO remained the most popular among the databases.
4. There was a slight increase in the faculty access, posting 34 to 39 daily access by both full time and part time members.

**Recommendation:**
The OFF CAMPUS ACCESS service should be promoted aggressively by the library through its orientation and user education program, electronic bulletin board, printed promotional materials and close partnership and...
