Dr. Robert Stueart Visits the DLSU-Manila Library

By William SA Frias

The De La Salle University-Manila Library is honored to have been visited on July 30-31, 2007 by one of the pillars in the field of Library Science in the person of Dr. Robert D. Stueart, a Fulbright Senior Specialist and recipient of the highest honor (honorary membership) bestowed by the American Library Association (ALA) in 2006. Dr. Stueart has contributed greatly in the development of Library Science, both nationally and internationally. Some of his works include: Library and Information Center Management, now on its 7th edition, International Librarianship: A Basic Guide to Global Knowledge Access, and Performance Analysis and Appraisal: A How-To-Do-It Manual for Librarians (as a co-author). Dr. Stueart was also instrumental in the development of the library profession in Vietnam.

Highlights of his visit included a guided tour of the Library, a meeting with the members of the Library Management Committee (LMC), and sharing of his valuable ideas and knowledge through lectures. He conducted two lectures. The first was entitled Knowledge Based Management for Higher Education where he discussed about the holistic view of knowledge, its assimilation from data to enlightenment, and the application of knowledge management to libraries and the role of librarians. He ended the lecture by saying “Librarians are the ultimate search tool, with a more interactive and human touch.” His second lecture where he emphasized on the qualities of a good leader and compared a leader from a manager was entitled Leadership Building for Librarians and Information Professionals. He ended the lecture by quoting Jamie Williams: “Leadership is like gravity. You know it’s there, you know it exists, but how do you define it?”

Dr. Stueart commended the DLSU-Manila Library for being well-organized and clean and for having competent and accommodating staff. He also gave a signed copy of the latest edition of his book Library and Information Center Management.

The DLSU-Manila Library is very grateful to Dr. Stueart for sharing his knowledge and expertise and for his generosity.
Balangue and Valerio Deliver Lectures

Ms. Jocelyn Balangue, Head of the Acquisitions Section was invited as resource speaker at a forum jointly sponsored and organized by the Philippine Association of Academic and Research Librarians (PAARL) and the Association of Booksellers of the Academe and the Profession (ABAP). The forum was held on July 26, 2007 at SM Megamall, Mandaluyong City during the 11th Philippine Academic Book Fair. Her paper entitled “Current Trends and Best Practices in Collection Development” discussed on the underlying concepts and integral components of collection development, focusing on current trends and best practices as applied to libraries and highlighting the acquisition of electronic based library materials.

Ms. Marita G. Valerio, Bibliographic Control Librarian and alumnus of the University of Santo Tomas, also lectured on Creating Webliographies during a forum sponsored by the University of Santo Tomas Library Science Alumni Association (USTLSAA) on July 27, 2007 at the UST Library Conference Hall. The forum was attended by UST Library Science students and librarians from different institutions, most of whom are members of the alumni association. Her presentation emphasized on the role librarians have to play in providing subject access to information on the Internet through the creation of webliographies as a means of supplementing the library resources and promoting other library services online.

Webliographies are digital equivalent of bibliographies which aid researchers in finding useful, relevant, and reliable sources of information from the Internet on a particular topic.

The Hybrid Library: Integrating Print and Digital Resources in Library Collections

On July 16-17, A. Fresnido, Library director, attended a seminar sponsored by the Center for Human Research and Development Foundation, Inc. entitled The Hybrid Library: Integrating Print and Digital Resources in Library Collections. The two-day seminar-workshop aimed to: (1) know the significance of integrating print and digital resources in the different collections of the library; (2) understand the roles played by the creators, publishers, aggregators and librarians in the digital information supply chain; (3) learn how an integrated library system contains the digital archives and cataloging of e-resources using the MARC format; and (4) raise level of awareness on the impact of licensing agreements on e-resources in libraries.

Four lectures were delivered during the first day focusing on the definition of a hybrid library and how to establish, develop, and maintain the collections in a hybrid library. Case studies of libraries abroad were also presented to give the participants insights on how to start a hybrid library or shift from a traditional library to a hybrid library. On the second day, three lectures with hands-on demonstrations were presented which particularly discussed on integrating digital archives into the collection, licensing agreements on e-journals and other digital collections, and cataloging of digital resources.

Based on the lectures delivered, it can be concluded that the DLSU Library is now at the mature stage of being a hybrid library in terms of collection, staffing, facilities, and the patrons’ capability to use the collections, both print and digital, with ease.
Free Trial Access to ScienceDirect eBooks

The DLSU Library is currently participating in an institution-wide complimentary trial of eBooks on ScienceDirect. This means that authorized library patrons have 24/7 online access to more than 500 titles spanning all scientific disciplines. These eBooks are fully integrated with the existing books and journals on ScienceDirect and the Library is encouraging everyone to take advantage of this opportunity.

Visitors
